Control Cabinet and Workstation

Introduction

U.P.I Valve Remote Control System is designed for reliable and cost-effective operation throughout the ship's entire life using latest available technology. Our VRCS can be controlled Valve, Pump and Hydraulic Pump by PC Workstation, LCD Color Touch Graphic Panel or Mimic diagram are builted-in the various kind of control cabinet. And also these are indicated Tank Level/Volume/Temperature, Draft Level and Valve/Pump/Bilge conditions.

Piano Type Console

- Equipped with :
- TFT Color Monitor
 - Analogue/Digital Indicator
 - Programmable Logic Controller (PLC)
 - Mechanical switch/lamp
 - Alarm annunciator
 - Related system made in other companies

Floor Mount Type

- Solenoid valve
- Flow meter
- Various kind of hydraulic parts

Floor Mount Type

- LCD Color Touch Panel
- Programmable Logic Controller (PLC)
- Mechanical switch/lamp
- Alarm annunciator
- Related system made in other companies

DCS Unit of Built-in Type

- Programmable Logic Controller (PLC)
- VRCS circuit
- Level measuring circuit
- Intrinsically safe circuit
- Digital Communication for AMS and Loading Computer
- Alarm annunciator circuit

PC Workstation

- Marine-specific TFT color monitor
- Marine-specific Personal Computer
- Keyboard and controller
- VRCS
- Alarm annunciator
